

My Photography Submission:

Tuuq, in his kingly, god-like glory. Perched atop his favourite bed on any given afternoon, soaking up the glorious setting sun. From here, this sleepy predator has complete views of the leafy suburban street below, in the very best position to doze in and out of slumber whilst keeping watch of his bustling domain.

Conditions: Mostly clear, warm spring afternoon with a very light breeze.

Device/Camera: iPhone X

Editor: Edited and shot by myself

Edits: The image was also edited on the iPhone's standard 'Photos' editing tool then downloaded from my iCloud.
